

# ORFER GROUP HAS SET THE FOLLOWING SCOPE 2 EMISSIONS REDUCTION TARGETS

Orfer Group (Later referred to as Orfer) has signed the Finnish Industry Energy Efficiency Agreement's technology industry action plan and is committed to its fulfillment. This is a sustainability initiative to which we are attaching our two largest Finnish facilities: Vaakatie 9A and Vaakatie 9B, Orimattila.

## Orfer's energy saving target for 2025

Through the implementation of this agreement, we have set Scope 2 energy conservation objectives for 2025 and are committed to executing an action plan to decrease energy consumption. The table displays the energy consumption of the facilities encompassed by the agreement for the two preceding years and their reduction goals for 2025.

Location	2022 total energy consumption	2023 total energy consumption	Reduction target to be achieved by 2025
Vaakatie 9A	527 MWh	460 MWh	7,5%
Vaakatie 9B	319 MWh	259 MWh	7,5%

Orfer's participation is confirmed through 31 December 2025.
